B2B Pipeline & Workflow Infrastructure

ENGINE	SYNC	ATTENDANCE
GoHighLevel	Google Calendar API	3-Tier Timed Sequence

SYSTEM ARCHITECTURE DIAGRAM

System Architecture Diagram

Lead Capture to Booking System

Platform Boundaries & Data Integration Layers

ARCHITECTURE TYPE	CORE ENGINE	INTEGRATIONS
Lead Acquisition Pipeline	GoHighLevel CRM	Google Calendar API & SMTP

SYSTEM SCOPE: Structured frontend ingestion linked directly to automated database records, calendar availability rules, and email confirmations.

Client Ingestion Layer (Frontend) 01

COMPONENTS: GoHighLevel Form Widget & Landing Page

INPUT FIELDS
- Name, Email, Phone Number, Preferred Contact Method

PURPOSE: Captures and validates visitor details at first point of contact.

Core Automation Engine (GHL Workflows) 02

COMPONENTS: Workflow Triggers & Execution Branching

CONFIGURED SEQUENCES
- Lead Ingestion (Triggers alert and auto-reply email)
- Calendar Scheduler (Validates availability, holds slot)
- Reminder Queue (Triggers timed reminder email cadence)

PURPOSE: Runs business rule logic, validates fields, and dispatches automated responses.

Data & Synchronization Layer (Integrations) 03

COMPONENTS: GoHighLevel CRM & Google Calendar Integration

DATA FLOW
- CRM Custom Contact Fields (Normalized schema mapping)
- Two-Way Calendar Sync (Google Calendar to GHL availability)

PURPOSE: Maintains synchronization of availability blocks and eliminates double-bookings.

Communication & Alert Delivery Layer 04

COMPONENTS: Gmail SMTP Services

OUTPUT CHANNELS
- Prospect Confirmation Emails
- Consultant Inbound Lead Alerts
- 24h, 1h, 5m Scheduled Reminders

PURPOSE: Executes outbound transactional messages to keep clients informed and reduce no-shows.

Unified Scheduling & Lead Management Pipeline

OPERATIONAL CHARACTERISTICS
- Automated workflow execution
- Connected calendar availability
- Standardized customer communication
- Structured appointment reminders

End-to-End Pipeline Topology

Every inbound inquiry follows one fixed path from form submission to a confirmed consultation. Calendar sync and timed reminders run without manual coordination.

INGESTION	GoHighLevel form widget and landing page
MIDDLEWARE	GoHighLevel workflow engine, event-triggered
CALENDAR ENGINE	Two-way Google Calendar sync with GoHighLevel
NOTIFICATION HUB	Gmail SMTP email confirmations & 24h/1h/5m reminders.

[STATUS : DETERMINISTIC TRIGGER EXECUTION]

OPERATIONAL DATA FLOW : LEAD TO CONFIRMED CONSULTATION

01 — Lead Enters System
Consultation landing page

> **02 — Lead Capture Form**
Name, email, phone, contact method

> **03 — Input Validation**
Required fields, email format

04 — Automation Trigger
Starts all downstream actions

> **05 — Thank You Page**
Guides lead to scheduling

> **06 — Appointment Booking**
30-minute slot, GHL calendar

07 — Booking Confirmation
Details, reschedule, cancel

> **08 — Calendar Sync**
GoHighLevel and Google Calendar

> **09 — Reminder Sequence**
24h, 1h and 5m before

CONFIRMED SCHEDULED CONSULTATION

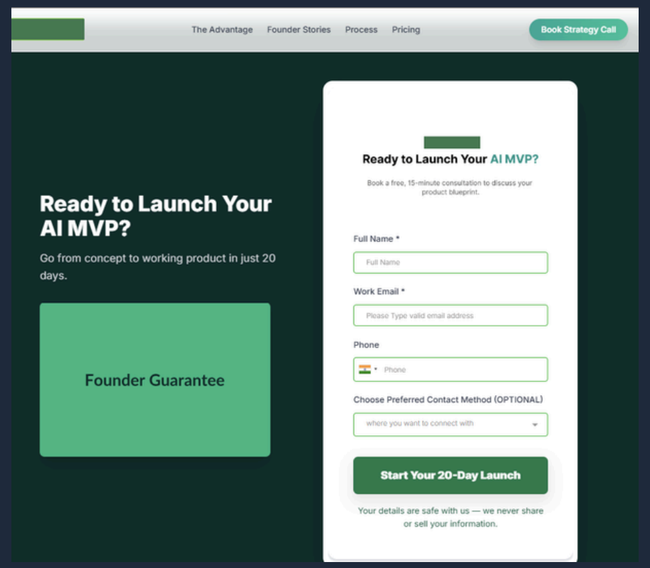

Pre-Qualification Intake and Confirmation

The landing page form captures structured lead data before any calendar access. A confirmation screen then guides the lead straight to scheduling.

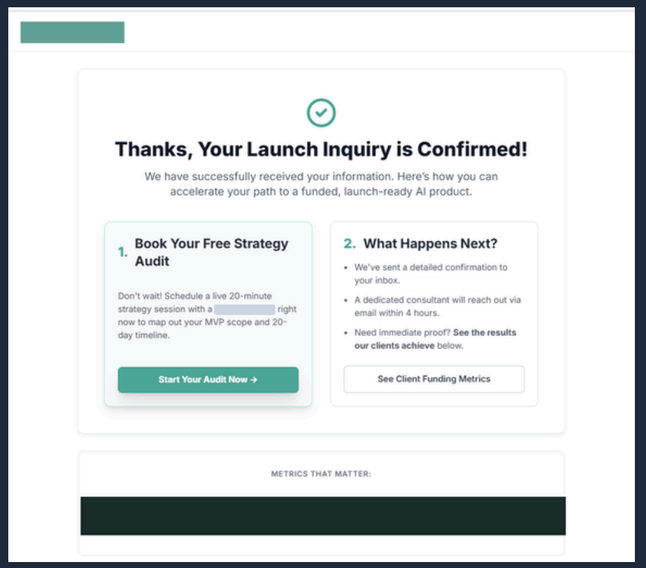

FIELDS	Full name, work email, phone, optional preferred contact method
REQUIRED FORMATS	Valid email address, phone with country selector
VALIDATION LOGIC	Required-field and email-format checks before processing
REDIRECT PROTOCOL	Confirmation page after submit, then booking calendar

[STATUS : VALIDATED BEFORE PROCESSING]

INTAKE FORM

CONFIRMATION PAGE

SUBMISSION FLOW

01 SUBMIT
Form submitted

>

02 VALIDATE
Required fields, email format

>

03 CONFIRM
Thank-you page and email

>

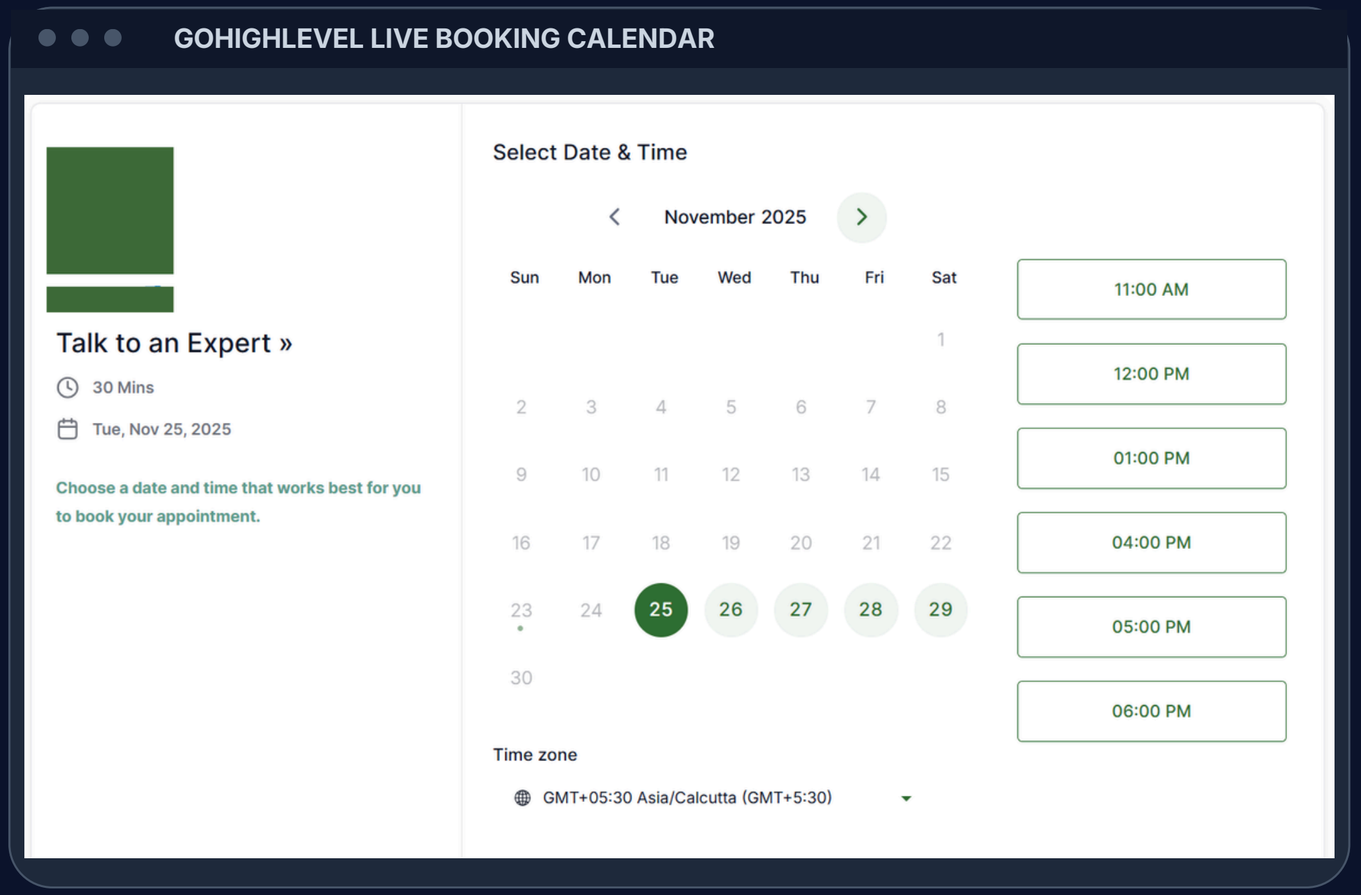

04 SCHEDULE
Booking calendar opens

2-Way Google Calendar Synchronization

Open slots reflect live Google Calendar availability, so a lead can only book time that is actually free. Conflict prevention runs inside the booking widget.

SYNC	Bidirectional: Google Calendar and GoHighLevel
BUFFER LOCKS	15-minute cool-down window between meetings
TIMEZONE	Visitor timezone selector on the booking widget
CONFLICT CHECK	Busy blocks removed from bookable slots

[STATUS : CONFLICT PREVENTION ACTIVE]

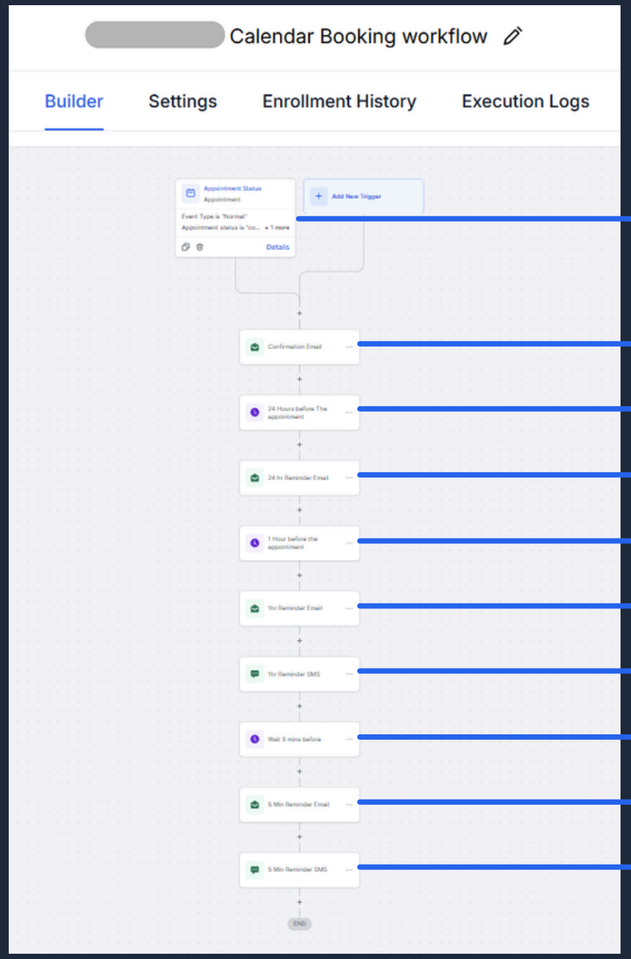

AVAILABILITY
Live from Google Calendar

DURATION
30-minute consultation

TIMEZONE
Selector on widget

GOHIGHLEVEL WORKFLOW BUILDER

TRIGGER | Appointment Status

IMMEDIATE | Confirmation email

WAIT | 24 hours before

24 HOURS | Reminder email

WAIT | 1 hour before

1 HOUR | Reminder email

1 HOUR | Reminder SMS

WAIT | 5 minutes before

5 MINUTES | Reminder email

5 MINUTES | Reminder SMS

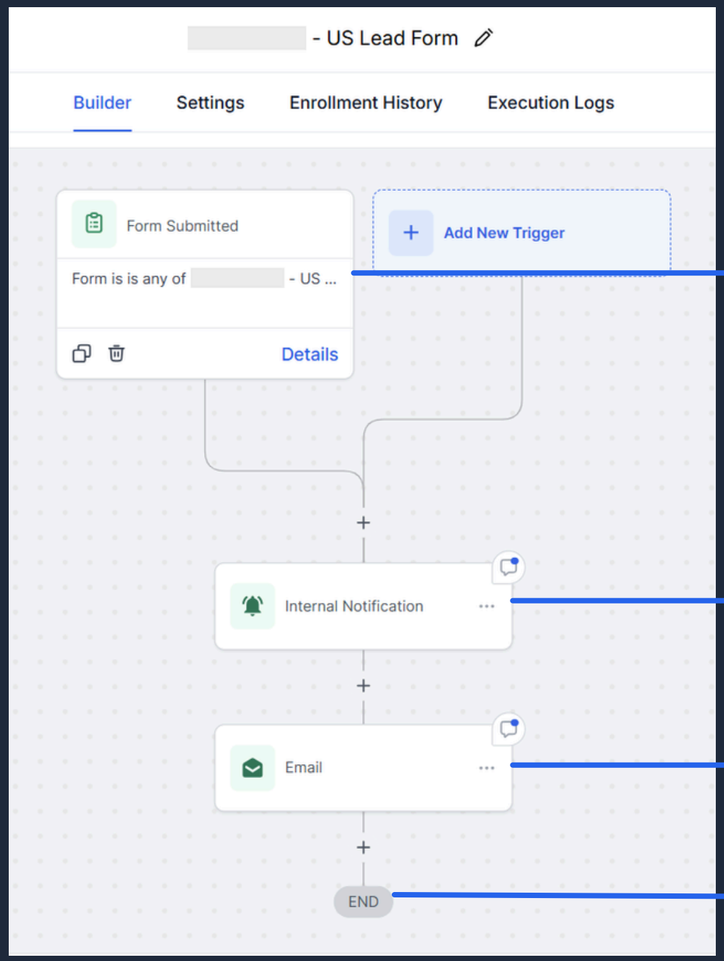

Multi-Tier Attendance and Reminder Engine

One appointment trigger starts a timed reminder sequence across email and SMS. Each touch is queued inside the workflow, so no reminder depends on manual follow-up.

STEP 01	Immediate confirmation email on booking
STEP 02	24-hour reminder email
STEP 03	1-hour reminder email plus SMS
STEP 04	5-minute final alert, email plus SMS

[STATUS : 3-TIER REMINDER CADENCE]

GOHIGHLEVEL WORKFLOW BUILDER

TRIGGER
Form Submitted (US lead form)

ACTION 01
Internal notification to team

ACTION 02
Confirmation email to lead

END
Run recorded in Execution Logs

Lead Intake Workflow and Internal Routing

Each form submission fires the same two actions: a team alert and a lead confirmation. No one has to check form responses by hand.

TRIGGER	Form Submitted (US lead form)
DISPATCH	Internal notification to the team
LEAD REPLY	Confirmation email to the lead
AUDIT LOG	Enrollment History and Execution Logs

[STATUS : INSTANT TRIGGER ON SUBMIT]

Deploy This Exact Inbound Engine in Your Business

I engineer, configure, and hand over complete GoHighLevel scheduling infrastructure with two-way Google Calendar sync. Every asset below is built, documented, and transferred to your team.

DELIVERABLE SCOPE INVENTORY

01 - INTAKE UI
Embedded form and confirmation page

02 - CALENDAR
Booking widget with 2-way Google sync

03 - REMINDERS
24h, 1h, 5m attendance workflow

04 - ROUTING + DOCS
Lead alerts, architecture and flow diagrams
